Appendix No. 2 Rules of using Standard Bikes with a Child Seat

1. The maximum load of the Bike equipped with a child safety seat must not exceed 114 kg.
2. The use of a Bike equipped with a child safety seat is possible only under the supervision of a legal guardian of a child having an account in the BiKeR System. The legal guardian is obliged to correctly secure the child in the safety seat in accordance with the instructions for use placed on the seat.
3. In case of any doubts as to how to properly secure the child in the safety seat, the System User may contact CC by phone.
4. Bikes fitted with a child safety seat are intended for the carriage of children between 9 kg and 22 kg who are able to sit without assistance for a prolonged period of time at least as much as the intended journey on a Bike.
5. Before placing your child in the safety seat, make sure that the seat, the Bike attachment and the restraint system are not damaged, do not show signs of damage, are not loose and are securely attached to the Bike. It is also recommended to check the temperature of the seat (whether it is not excessive, e.g. due to direct sunlight). If any irregularities are observed, in particular if the seat is defective or defectively installed in a Bike, the BiKeR System User should inform the Operator via CC BiKeR and in such case the use of the seat is prohibited.
6. The legal guardian takes full responsibility for the child when renting a Bike equipped with a child safety seat.
7. The child carried in the child seat should wear a protection helmet adjusted in size to the child's head and correctly fastened (it does not constitute an accessory of the Bike). Securing the child against potential unbeneficial weather conditions is also recommended, i.e. against rain or excessive sunlight through proper outfit.
8. The child should be placed in the child safety seat in such a way as to ensure optimum comfort and safety when riding, using a restraint system that ensures that the child's movements are restricted in the child safety seat. It is recommended that the backrest should be inclined slightly backwards.
9. It is the responsibility of the User to ensure that the transported child is protected in such a way that it cannot fall out while riding. If the accident occurs due to the improper use of the restricting mechanism, the Client will be liable for the resulting liability.
10. Before you start riding, make sure that:
 - a. it is not possible for any part of the child's body, clothing or safety components to come into contact with the moving part of the seat or the Bike,
 - b. the additional load on the Bike does not adversely affect the steering or balance of the Bike, which is necessary for safe riding on the Bike;
 - c. the child's weight and body size do not exceed the maximum load of the seat (this should also be checked while riding).
11. Making modifications to the seat or attaching any additional luggage to the child restraint system is forbidden. One must remain particularly careful when riding a Bike with the child in the seat, bearing in mind that your Bike may behave differently in terms of balance, steering and braking. In particular, one should adjust the speed to the limitations of travelling with an additionally loaded Bike.
12. During the use of the Bike it is necessary to check if the Bike rack with the seat installed is functioning properly and if the child transported does not cover in any way the reflections placed on the Bike rack or seat.
13. One should also take special care not to leave the Bike parked with the child in the child safety seat unattended.
14. Rental and Return of the Bike with child seat is possible at any station.
